

# CAREER SERVICES

## Corporate Partner Program

### About Us

The Texas A&M University at Galveston Department of Counseling, Career & Ability Services provides support and resources to students at every stage of the career planning process.

In addition to student support, Career Services serves as the front line for employers looking to hire the best-in-class candidates. Employers can utilize the Career Services team for on-campus recruiting and education, posting of positions, and generating leads for candidates post-graduation.

### What We Offer

The department offers resume and cover letter training, interview preparation, and mock interviews for students preparing for their job search.

Students can participate in specialized workshops for professional networking, finding jobs and internships, as well as the two annual career fairs hosted on campus.

### Partner with Us

To enhance student support, Career Services strives to prepare best-in-class candidates. Looking ahead, the department plans to add programs like etiquette training, conference attendance, and professional development opportunities. Employers can ensure student success and support these programs by becoming a corporate partner with Career Services.
