Research Experience

RESEARCH FOCUS

My research program seeks to shed light on the differential contribution of micro and macro evolutionary processes responsible for the genetic population structure of marine organisms, with emphasis on highly migratory fishes. The nature of my research is both integrative and comparative, falling within the conceptual framework of molecular ecology & molecular systematics. Most work is conducted at the population level to examine how observed genetic variability can be accounted by past and current events. Evidence regarding current events is obtained from the species' life history and population dynamics. Inference of the historical context is derived from the analytical toolkits of statistical phylogeography and historical demography, that when combined with paleoceanographic, paleoclimatic, and geologic evidence, permits the testing of alternative hypotheses capable of explaining the current distribution of genetic variation within and among populations. Central to this holistic approach is the hypothesis that an animal's distribution is constrained by its potential to disperse based on morphological and physiological adaptations (at any point in time during ontogeny) in light of past and present barriers (biotic or abiotic) that may limit gene flow, thus ultimately delimiting that species range, and thus potentially accounting for micro- and macro-evolutionary patterns. The advent of massive parallel sequencing technologies offers the opportunity to further expand these investigations at a genomic level and current emphasis of my research program is to take advantage of current advances in these technologies to address these questions.

2000. NOAA/S-K. PI. Spatial and temporal analyses of genetic variability in bigeye and yellowfin tuna larvae 09/01/00-12/31-01 \$45,613 (\$45,613 to Alvarado Bremer/TAMUG)

Funded Internal Grants and Awards, TAMUG, TAMU, and TIO

2012. State of Texas Development Fund. PI. *Mariculture Training Internship Program*. Sept 1, 2012-Aug 31, 2013, \$16,000 (\$16,000 to Alvarado Bremer/TAMUG)

2011. State of Texas Development Fund. PI. *Mariculture Training Internship Program*. Sept 1, 2011-Aug 31, 2012, \$20,000 (\$20,000 to Alvarado Bremer/TAMUG)

2010. State of Texas Development Fund. PI. *Mariculture Training Internship Program*. Sept 1, 2010-Aug 31, 2011, \$20,000 (\$20,000 to Alvarado Bremer/TAMUG)

2009. State of Texas Development Fund. PI. *Mariculture Training Internship Program*. Sept 1, 2009-Aug 31, 2010, \$20,000 (\$12,153.78 to Alvarado Bremer/TAMUG)

2005. PI. TAMUG RC/ Faculty Minigrant. A novel approach to characterize the nutritional condition of fish larvae. June-August 2005, \$3,222

2004. PI. Genetic variation in Atlantic croaker. TAMUG Research Advisory Committee Faculty Mini-grant Project Period: August 2004. \$2,500

Awards Prior to TAMUG

1999. Spatial and temporal analyses of genetic variability in bigeye and yellowfin tuna larvae Agency/Program: NOAA/SK, July 1, 1999 to June 31, 2000, Alvarado Bremer, J. R. (PI), \$80,000

1998. Molecular Genetics of Fish Populations. South Carolina Sea Grant Consortium/Fishtec. B. Ely (LPI), J. Quattro (CO-PI), Alvarado Bremer, J. R. (CO-PI) Grant amount: \$617,838 (Project period- 3 years); \$205,946/per year.

Research Tools

Molecular genetics: Expertise in conducting molecular approaches to characterize genetic variation of wild and captive populations including numerous isolation methods of total genomic and mitochondrial DNA, restriction digests, Sanger sequencing, high resolution melting (HRM), loop mediated isothermal amplification (LAMP), ddRAD sequencing. Digital photo documentation.

Bioinformatics: Expertise using software for: phylogenetic inference (Phyliip, PAUP, MEGA); Population genetics\genomics (GENEPOP, GenAlex; Arlequin); Massive Parallel Sequencing (Galaxy; STACKS); Sequence analysis (Geneious). GIS (ArcSys).

Organismal: Handling of wild caught animals, Aquatic animal husbandry and mariculture techniques, fish anesthesia, external fertilization of fish eggs. Fish otolith removal. Preservation of museum specimens.

Field Methods. Capture of highly migratory fishes with longlines, electronic and conventional tagging of fishes, Environmental characterization of marine environments, Electronica and

Conventional Fish Tagging, Banding of Flamingo fledglings, Small boat handling, Biopsy sampling. Capture of small mammals (Bats and rodents). Paleontological prospection. Photo identification of marine mammals. Census of marine mammals.

Field Experience

Ichthyoplankton sampling of fish larvae using bongo nets, neuston nets and light traps; capture of large mesopelagic fishes using longlines and hook and line; capture of deep sea fishes using baited traps; benthic trawling for demersal fishes; deployment of seines and gillnets; field sampling and preparation of small mammals (bats and rodents) for scientific collections; paleontological prospection and collection of fossil sharks, marine mammals, and dinosaurian fauna; coastal ornithological surveys; census of marine mammals (pinnipeds and cetaceans).

Research Cruises

1984. Oceanographic cruise to the Gulf of Mexico, the Yucatan Channel and Caribbean on board of the B/O Justo Sierra. CINVESTAV IV. Capture of billfishes, sharks using longlines. Capture of deep sea sharks using traps
1985. Oceanographic cruise to the Bay of Campeche, the continental shelf of the Yucatan Peninsula, and Strait of Yucatan. Ichthyoplankton survey using neuston nets. B/O Justo Sierra. CINVESTAV V
1989. Oceanographic cruise aboard the Department of Fisheries and Ocean (DFO), Canada, EE Prince. Longline capture of swordfish on Georges and Grand Banks, off Nova Scotia and Newfoundland waters.
1990. Oceanographic cruise aboard the Department of Fisheries and Ocean, Canada, EE Prince. Longline capture of swordfish on Georges and Grand Banks, off Nova Scotia and Newfoundland waters.
2005. Oceanographic cruise on board of the O/V Holo Kai. Ichthyoplankton sampling of Northern Gulf of Mexico using neuston nets and purse seine nets.
2006. Oceanographic cruise on board of the O/V Holo Kai. Ichthyoplankton sampling of Northern Gulf of Mexico using neuston nets and purse seine nets.
